

Affiliate Board members are ambassadors for the Leukemia Research Foundation and its mission to conquer all blood cancers.

They achieve this goal through raising awareness by way of their social and professional networks.

As ambassadors, they are planning fundraising events and engaging others to support the Leukemia Research Foundation.

With regular meetings Affiliate Board members have the opportunity to network with others who are interested in making a difference in their community and significantly impacting the Leukemia Research Foundation's mission.

The board will hold approximately 8-10 meetings per year and members are asked to attend at least 5 of those meetings.

As fundraisers for the Leukemia Research Foundation, they support our mission by securing sponsorships, raffle prizes, soliciting donations, and promoting our events to their personal and professional networks.

Affiliate Board members can choose between serving on a subcommittee either as a chair or in a support position to that committee.
